Gumroad: <https://weasert.gumroad.com/>

SUMMARY

Independent Game Developer with experience in game development, shader programming, gameplay systems, and software development. Skilled in Godot Engine, GDScript, Python, JavaScript, HTML, and CSS. Experienced in building complete games, publishing commercial game development assets, and using Git/GitHub for version control. Focused on gameplay programming, graphics programming, and technical art.

EDUCATION

Dyal Singh Public School

Class XI (PCM + Computer Science)

2026 – Present (Currently Studying)

Dyal Singh Public School

Class X, Score: 80%

Completed: 2026

EXPERIENCE

Independent Game Developer

2025 – Present

Analytical Orange Studio

- Develop gameplay systems, shaders, and tools using Godot Engine.
- Design and implement interactive game mechanics and UI systems.
- Maintain projects using Git and GitHub.
- Publish commercial game development assets and indie projects.
- Participate in game jams and independent development work.

PROJECTS

Shader Showroom – Commercial Godot Asset Pack

- Published a commercial post-processing shader pack for Godot 4.7+.
- Includes 7 production-ready shaders: Anime Cel Shading, ASCII Cyberpunk, Kuwahara Oil Painting, Manga Halftone, Blueprint Sketch, RGB Quantization, Retro Lo-Fi Rendering.
- Built an interactive 3D showcase environment for real-time shader testing.
- Implemented runtime shader switching and adjustable parameters.
- Optimized for modern rendering pipelines (Vulkan / Direct3D 12 / Metal).

Hornbound: Five Signals

- Developed and released a complete game for Godot India Community Game Jam 5.
- Designed a unique sound-based monster control system using horn signals.
- Implemented AI behavior, portals, health systems, and progression mechanics.
- Delivered a fully playable game under strict time constraints.

X (Ongoing Stealth Game Project)

- Developing a narrative-driven stealth action game with shadow-based mechanics.
- Implementing advanced AI detection systems and stealth gameplay loops.
- Designing vertical slice with professional production structure.
- Creating full technical and design documentation.

TECHNICAL SKILLS

GDScript
Python
JavaScript
HTML
CSS
Godot Engine
Git
GitHub
Shader Development
Game Design
UI Development
Object-Oriented Programming
Debugging & Optimization

GAME JAM EXPERIENCE

Godot India Community Game Jam 5 - Built and shipped a complete game within the jam deadline. - Worked on design, programming, debugging, and deployment. - Applied rapid prototyping and game development skills.

PORTFOLIO & LINKS

GitHub: <https://github.com/Weasert911> Gumroad: <https://weasert.gumroad.com/>

ACHIEVEMENTS

- Published commercial game development assets. - Developed and shipped complete indie games. - Experience in shader programming and gameplay systems. - Active independent game developer under Analytical Orange Studio.

INTERESTS

- Game Development - Gameplay Programming - Graphics Programming - Shader Development - AI Systems - Software Engineering - Technical Art
